*Real time data exchange: Save time and money, take rapid decisions, and improve efficiency*

*Transparency : automatic notifications to all involved parties*

*Be eco-friendly : end of papers*

*Compliant on federal level: 1 solution for the 3 regions*

*Traceability: a single platform to manage all your waste related documents with smart search capabilities*

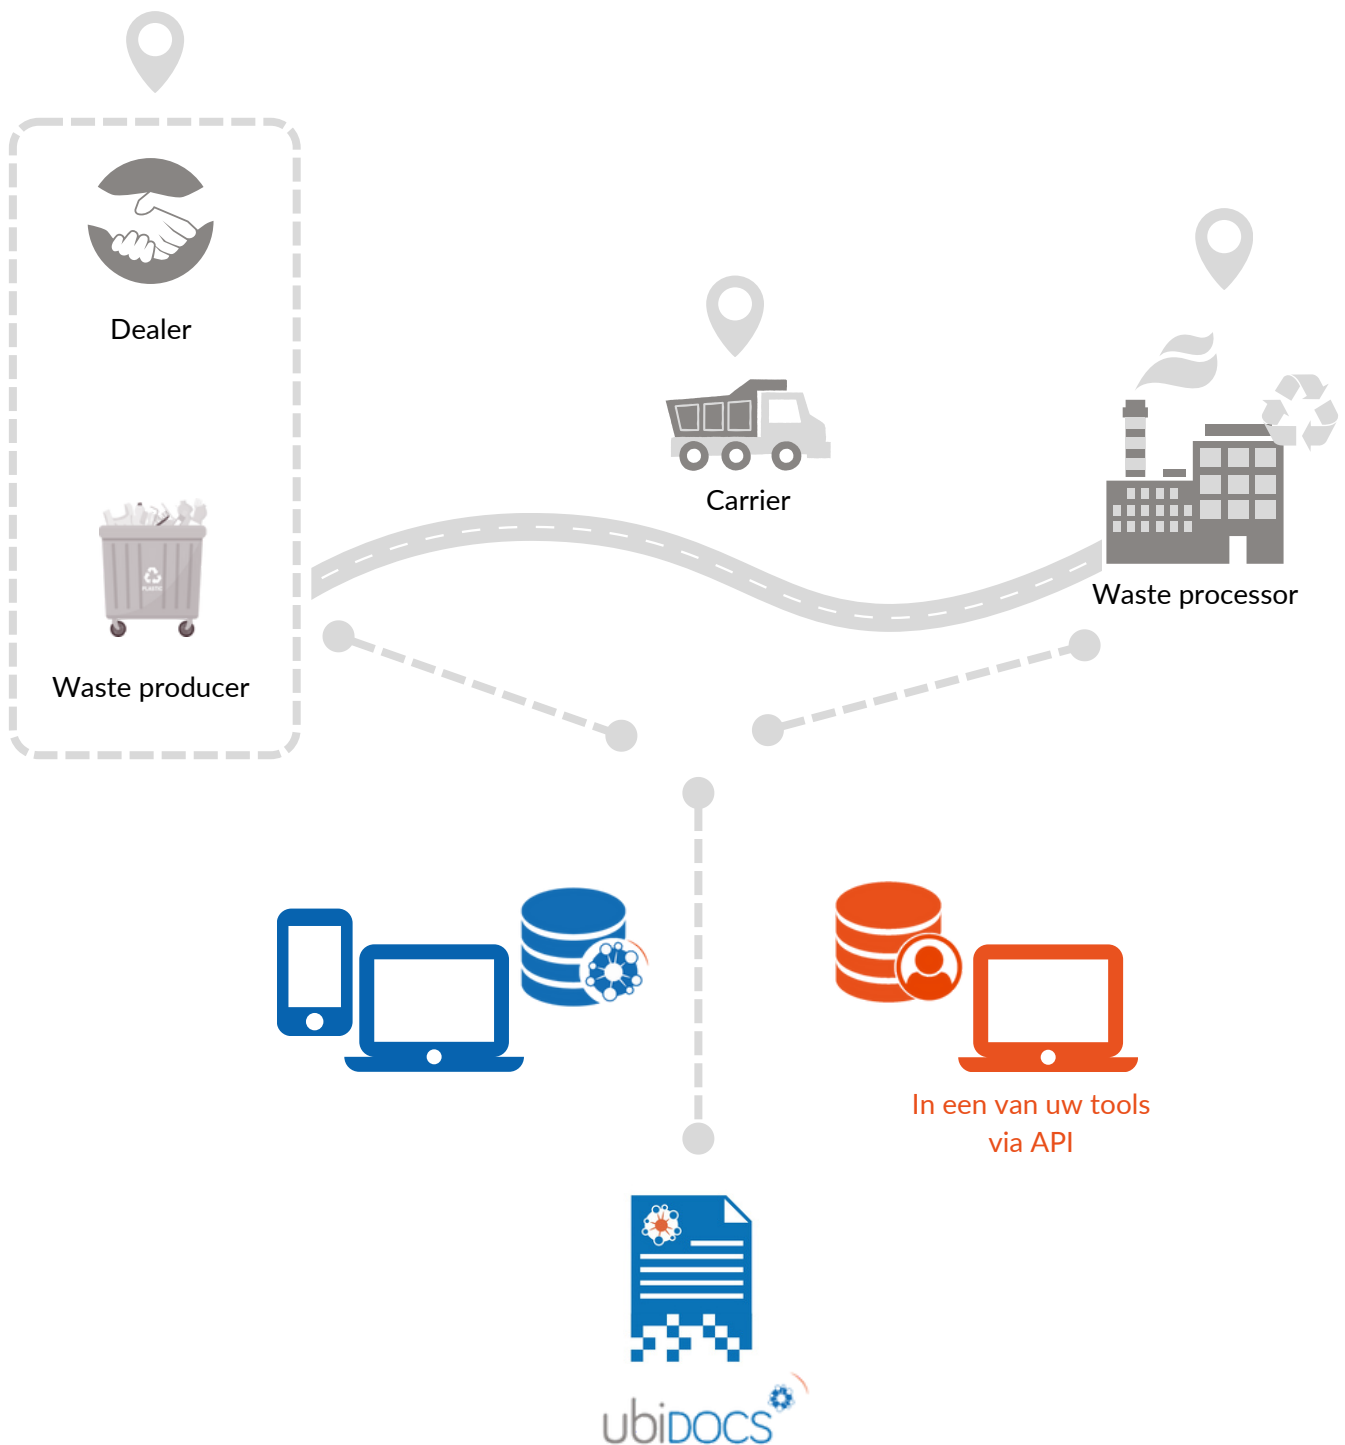

# Who is concerned?

All the actors of the traceability chain such as:

**Dealers or waste producers**

**Waste transporters**

**Waste processors**

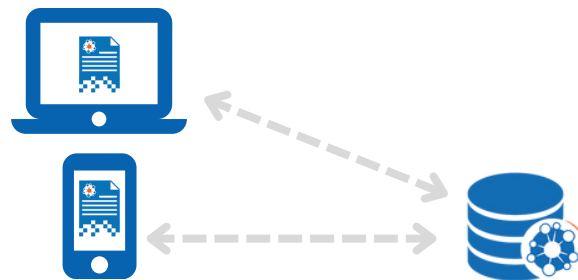

# How does it works?

*An application tailored to YOUR NEEDS!*

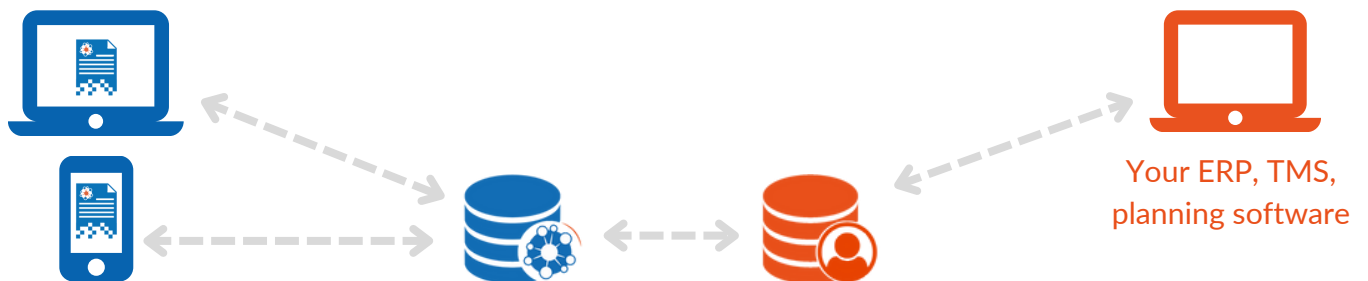

## As a stand alone application:

Manage your documents through a mobile app and a web portal

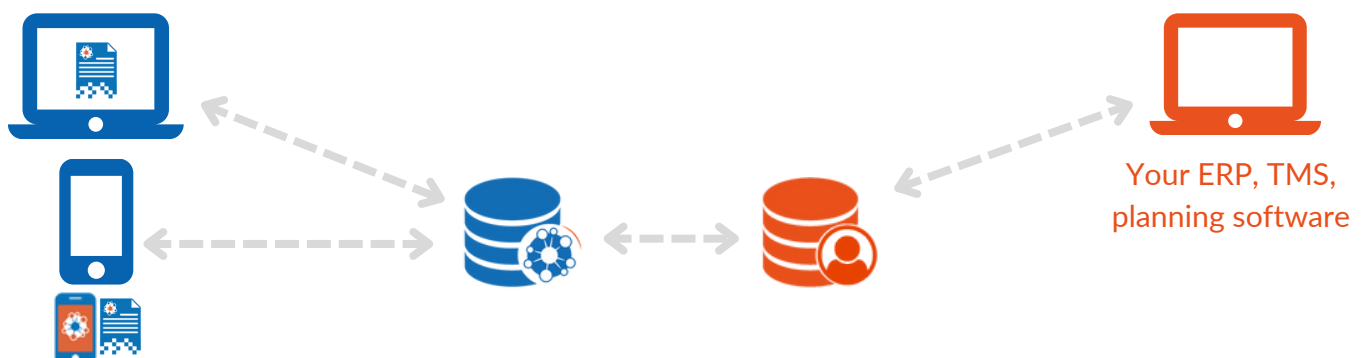

## As a stand alone application integrated to your IT:

Create your documents from your data and manage them in ubiDOCS. Recover relevant information in your system through back integration

## As a linked app to your logistic mobile solution ubiSMART:

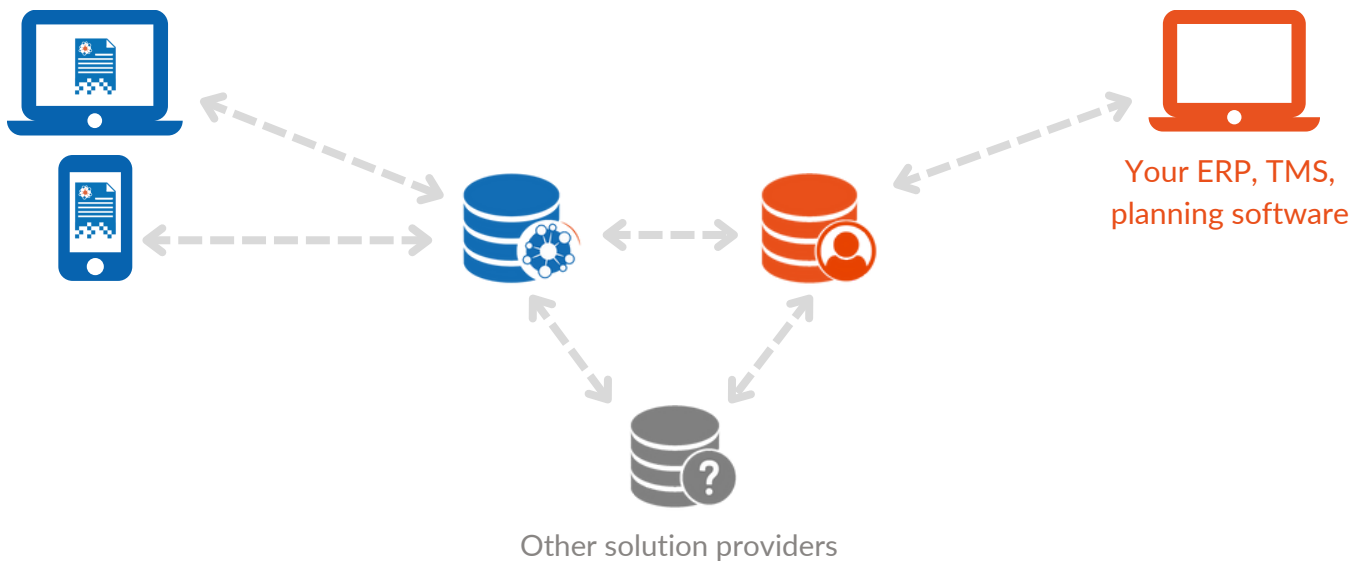

The document is automatically enriched through and managed in the background by ubiDOCS

# How does it works?

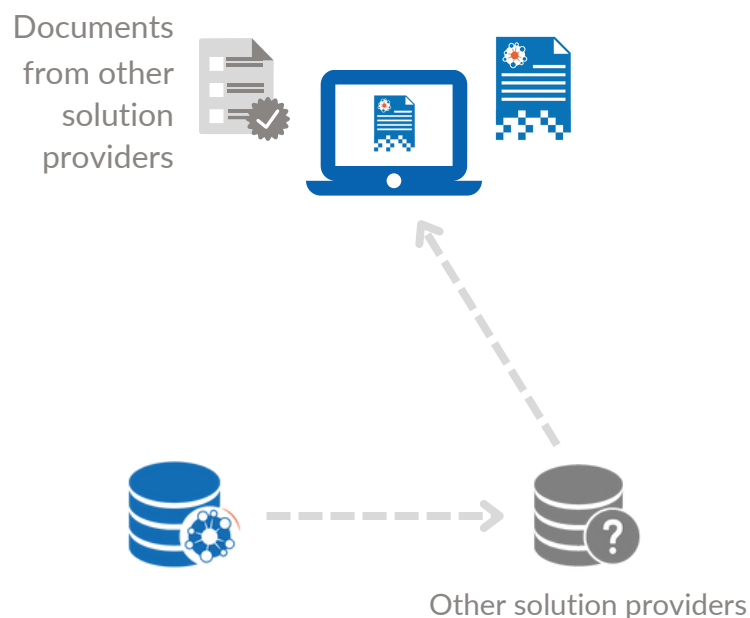

*An application tailored to YOUR NEEDS!*

As an integrated data exchange with other solution providers: we recover or send an incomplete/complete transport document to any other solution providers through API

As single document management system for all of your identification forms, regardless where these have been originally created

## Centralization of digital transport documents

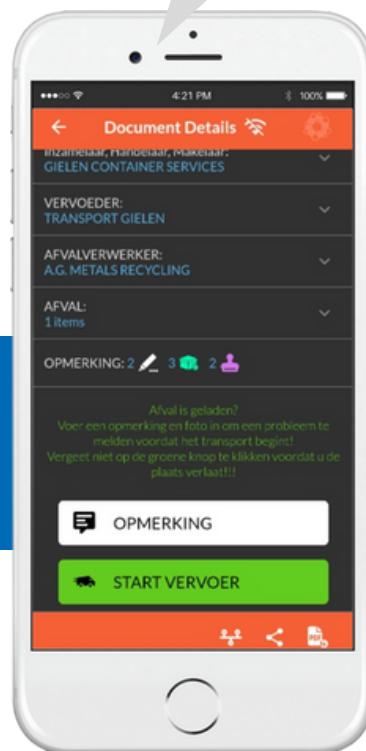

# Discover in pictures!
